

Wolvey Against Subsidised Turbine Energy

Rugby Borough Council Planning Meeting

Meteorological Mast Application

WEDNESDAY 3RD SEPTEMBER 2014
5:00pm - Town Hall, Rugby

The meteorological mast application is on the Agenda for the members of RBC Planning Committee to consider on 3rd September 2014. But as a group, WASTE is repeating their earlier requests that a site visit is carried out by our elected Councillors before any final decision is made.

If our request for a site visit is granted then there is a possibility that the application could be deferred on the 3rd September meeting and heard at a later date, following the requested site visit.

However, if this request for a site visit should be declined by the Councillors, then the application will be considered on the 3rd September 2014 and we need to be there!!!!!!

By having objectors present it will then help ensure that:-

- a) Our objections have been clearly noted by the council
- b) Our requested conditions are clearly referred to by our Cllr's and taken note of by the council and
- c) These perfectly reasonable conditions which we have requested are attached to any permission given.

If you can join WASTE members on 3rd September please meet us on the Town Hall steps in Rugby at 5pm, as we need to show a united front to Planning Committee members, whose meeting will commence at 5.30pm. The press will be there to hopefully capture the full extent of our opposition to this very controversial application.

RBC PLANNING COMMITTEE MEMBERS WILL DECIDE ON 3RD SEPTEMBER 2014

WE ALL NEED TO BE THERE!!!
