

## **Wolvey - Five Ways/Hinckley Rd/Lutterworth Rd: FTTP fibre broadband now live in parts of Wolvey**

We are delighted to advise you that all the hard work has paid off and that FTTP (Fibre to the Premise) broadband is now available in parts of Wolvey. The network in the area has been upgraded, meaning that some properties may now be able to order the improved service.

### **What is FTTP broadband?**

FTTP is a relatively new type of fibre broadband with ultra-fast speeds of up to 1000Mbps. FTTP has been rolled out in areas like yours where the more commonly used FTTC (Fibre to the Cabinet) technology is unsuitable.

### **What should residents do now?**

1. Check their upgrade status by entering their landline/address into the [BT Broadband Availability Checker](#). Our [How to use the BT Broadband Availability Checker](#) webpage will help them make sense of the results.
2. Sign up with an Internet Service Provider (ISP) for superfast services and choose the package which best suits their needs.

**Please note that this is not an “on demand” service. In other words it is only the properties that show on the DSL checker as having the FTTP service available that will be able to get it.**

Customers are not restricted to buying a service from BT and that they can go to other Internet Service Providers (ISPs).

However, as FTTP is a relatively new technology, not all ISPs currently offer this service. For an up to date list of FTTP broadband providers and for more information about ordering an FTTP service, visit the ‘Fibre to the Premises’ page on the CSW Broadband website.

## **What are the benefits of having faster and superfast broadband?**

Having access to superfast broadband allows you to:

- Browse the web faster
- Stream HD films, TV shows, games and videos without buffering slowing you down
- Talk face-to-face with friends and family using Skype, FaceTime or similar software
- Compete with other businesses in the increasingly competitive global marketplace
- Reduce workplace costs through remote working / working from home

## **Get the word out**

Now that superfast broadband is available, it's important to make sure that all residents in your area can take advantage of its benefits and we need your help to do this. We are looking for people who live and/or work within our local communities to help us inform people that the new service is available. This would involve putting up posters on local notice boards and delivering leaflets to households in your area.

**If you are willing to help us spread the word, please email us at [broadband@cswbroadband.org.uk](mailto:broadband@cswbroadband.org.uk)**

We also have copy available for you to use in your newsletters or on your website. This is a short piece, (approximately 200 words) that you can simply cut and paste to help spread the good news. Please email us if you would like to use this. Now that superfast broadband is available, it's important to make sure that all residents in your area can take advantage of its
