

**It's Here!**

## **Superfast broadband has arrived in your area!**

### **What are the benefits of having superfast broadband?**

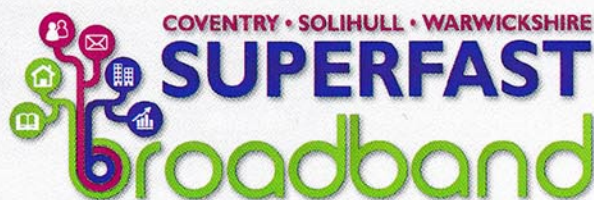

Having access to superfast broadband allows you to:

- Browse the web faster
- Stream HD films, TV shows, games and videos without buffering slowing you down
- Talk face-to-face with friends and family using Skype, FaceTime or similar software
- Compete with other businesses in the increasingly competitive global marketplace
- Reduce workplace costs through remote working / working from home

**Superfast broadband – always on, always ready**

# Superfast broadband has arrived in *your* area!

## How do I order a superfast service?

### It's as easy as 1, 2, 3!

1. To check if you are ready to go superfast enter your landline or address into the BT Broadband Availability Checker at [www.dslchecker.bt.com](http://www.dslchecker.bt.com)
2. If superfast is available, either 'VDSL Range A & B' or 'WBC FTTP' will be listed under 'Featured Products' along with the speeds you are likely to achieve.
3. Use a comparison site such as Money Saving Expert or USwitch to find and order a superfast package that meets your needs.

**Remember:** You won't get a superfast service automatically. You need to order the improved service with your chosen ISP (Internet Service Provider) to benefit from it.

### Further information:

To help make sense of the BT Broadband Availability Checker results visit: [www.cswbroadband.org.uk/usingbroadbandchecker](http://www.cswbroadband.org.uk/usingbroadbandchecker)

To find out more about ordering an FTTP (Fibre to the Premise) service visit: [www.cswbroadband.org.uk/fttp](http://www.cswbroadband.org.uk/fttp)

## Superfast broadband – always on, always ready

**Please note:** In some circumstances unexpected issues may arise which means that even after an FTTC cabinet upgrade, there is no guarantee that every property connected to it will benefit due to some properties' distances from the cabinet and/or the quality of the copper connection.
