Award-winning food

We believe that everyone should be able to enjoy mealtimes which is why we embraced innovative technology to create our award-winning range of texture-modified food for people with dysphagia (swallowing difficulties). Dysphagia can be a serious threat to the health of sufferers, which can include people with dementia, Parkinson's disease and stroke.

Our range includes over 70 nutritionally balanced softer and pureed meals and desserts in various consistencies to cater for a wide range of dietary needs.

Daily visit with safety & wellbeing check

We don't just deliver a meal; our drivers are all fully trained to carry out basic safety and wellbeing checks. For instance, if there's no reply they'll contact your family, friends or next of kin.

All our drivers have been DBS checked and carry an identification badge, you can be confident who is calling at your door.
