

37 ways to improve your internet speeds

For some residents, even achieving a fairly modest broadband speed can be quite a challenge, particularly if they are living in areas that haven't yet been upgraded or where they can achieve faster but not yet superfast broadband speeds.

If you are fed up of YouTube or Netflix buffering all the time then Broadband Savvy's ['How To Improve Internet Speed'](#) guide might be able to help. This useful resource contains 37 different methods that you can try to improve your internet speed – all of which have been tried, tested and proven to work by the authors.

The guide provides valuable information on how to test your internet speed, how to access your router settings, how to improve your WiFi speed and top tips and helpful hints on how you can make general improvements to the speeds you are currently able to achieve.

Each of the methods you can try are broken down into an easy to follow step-by-step actions and any technical jargon is explained so that it is easy to understand. So, if you are fed up with slow broadband speeds, some of these methods might be worth a try.

Useful advice for if you are thinking of changing your ISP in 2020

Consumers in the UK face a bewildering choice of providers and networks when trying to find a new home broadband ISP and this is only likely to get worse as a growing number of new ISPs enter this highly competitive market.

If you are looking for a new ISP but find the myriad of options available to you a little bit confusing, the ISPReview's, [The UK Best Home Broadband ISP Options for 2020](#) may be able to help.

In the article, their editor's annual pick aims to highlight some of the top ISP options in terms of quality and affordability that are available to you.

Consumer champions Which? have also recently published their report into the [best and worst UK broadband providers for 2020](#).

They note that while the best broadband companies offer a great service at a great price, provide a fast connection that you can rely on, and are on hand to help in the rare instance that something goes wrong, many broadband providers still don't deliver on those fronts.

While you have to pay to download the whole report, it is worth noting that this survey is based on the real-life experiences of thousands of customers across the UK and may prove to be money well spent if you are thinking of changing broadband provider and would like further information on choosing your next ISP.
